2001-03 journalist, moneycab, zurich

:::my motivation

rieveld academy - how do you think, how do you speak? i know you just from hearsay. how do you think, search, create and present yourself?
i wonder how your process of design looks like. i would like to get to know you, would like to feel how you live in your ambience. i want to realize our differences and to talk about it. i would love to put myself into action in your environment, to profit from your influence, to learn from you and to add new experiences to my life.
i am looking forward to you very much.

netherlands - who are you? i do not know you, i would like to visit you, to listen to you, to see you. are you strange or familiar. i do not know. in any case i am very interested in you.
you are bigger than my country. do you express yourself like we do or do you talk louder and in a different way? tell me some stories, i would like to tell you some of mine. let us do something together, let us exchange experiences.
